

Checklist for Authors of Drying Technology – An International Journal

(To be filled and attached to paper being submitted for possible publication in the journal)

Authors of Drying Technology – An International Journal are strongly encouraged to complete the following checklist and attach it to their manuscript when submitting the manuscript for review and possible publication in DRT; this will speed up the processing of the manuscript.

Prior to submitting your manuscript, please ensure that:

- This work is original and not previously published or copyrighted. All authors have contributed to the work in the order of authorship listed. The senior (first) author will be deemed to be the primary individual responsible for correspondence and technical content of the work presented. Include e-mail address for this author. *If the first author is not corresponding author, please give e-mail address of the corresponding author as well. Key words and phrases must not be ones appearing in the title of the paper.*
- The cover letter states main reason(s) for submission of the manuscript for archival publication (e.g., new data/analysis, new model, new theory, etc.) Marginal extensions to earlier publications do not warrant such publication.
- Three hard copies, prepared according to DRT instructions and format, are enclosed along with a softcopy on a diskette. The latter is needed for final, revised and accepted papers along with a signed copyright transfer form downloadable from http://www.geocities.com/drying_guru/drt.html.
- Earlier papers published in DRT have been searched and cited correctly, if relevant. Also, authors have checked contents of available IDS proceedings (see http://www.geocities.com/drying_guru/books.html for contents of most “Drying” volumes).
- References are cited correctly and in full according to the journal format. Spellings of author names as well as journal titles are given correctly.
- A full notation (symbols including units) is included.
- No color photographs are included in the paper. (Note: All figures must be drawn carefully with correct size of line thickness, symbols and fonts. Tables and figures must be assembled at the end of text.)
- Statements are included about reproducibility and accuracy of experimental data and numerical accuracy for computational works.
- The paper includes no quotes from copyrighted work without proper citation to the source.

Name of Author (preferably senior author responsible for the research content):

Affiliation

E-mail address

Note: Acknowledgement will be given only by e-mail. No acknowledgement can be sent by mail. Editors will not entire into correspondence with authors about receipt of the paper without a valid e-mail address. Allow 3 months for a decision. If no decision received within 3 months of manuscript transmission, please e-mail mpeasm@nus.edu.sg or tkudra@nrca.gc.ca.
